## Whisky bottling plant – Drive scroll shafts Reverse Engineering – Proven!

worldwideengineering were asked to manufacture a bespoke drive scroll shaft for one of the fastest whisky bottling lines at a famous bottling and packaging company.

We collected the original drive scroll shaft from the customer's workshop, saving the customer the cost and hassle of sending the shaft away.

We then identified the material specification and sent the customer a proposal to manufacture the shaft.

The customer kindly placed the order with us as we saved them money compared to the previous supplier and delivered the shaft to site within the timescale.

The shaft has been fitted and is exactly as per the customers specification!

Needless to say – Our customer is very happy!
